CORPORATE FINANCE

Current Version – September 6, 2005

Course Description.

The purpose of this course is to introduce techniques of financial analysis, with emphasis on topics in the corporate finance area. The concepts developed in Finance 100 form the foundation for all elective finance courses. The main topics covered include (1) the time value of money and the net present value rule; (2) valuation of bonds and stocks; (3) capital budgeting decisions; (4) uncertainty and the tradeoff between risk and return; and (5) corporate financing and dividend policy decisions.

Course Materials.

Required.

A course bulk pack available from Wharton Reprographics.

A scientific or business calculator. It will be necessary for your calculator to have a $x^y$ function.

Optional.

Evaluation.

The course grade will be based on two midterm exams, a final exam, and several assignments (to be handed in). The weightings are:
