Course Description: This course is introduction to Corporate Finance. It will cover some of the theory and practice of decision-making within the corporation, as well as assorted other topics; we will not attempt to cover the whole of this vast subject. Basic courses in Microeconomics and Statistics are prerequisites. Introductory accounting is also needed but may be taken concurrently.

Reading Material: The main reference for this course will be the packet of slides and class notes, which you should purchase from Wharton Reprographics and bring with you to class. In addition, the textbook for the course is the tenth edition of Principles of Corporate Finance, by Brealey, Myers and Allen (BMA); a detailed outline - with references to this text - is attached. You may also find the solutions manual to this textbook to be helpful; a copy is on reserve in the library. Finally, there is a packet of slides, cases, and other readings which you should also purchase from Wharton Reprographics (hardcopy) or online from http://www.study.net.

Grading Policy: Your grade will be based on a midterm exam on June 4 (25%), a comprehensive final on June 25 (50%) and four cases (25%). I will also replace your midterm with your final exam grade if it is higher. You should work together in teams of 3-4 (but no more) on your cases, and should hand in a joint solution with all of your names on it; please note, however, that each of you is required to pull his/her weight. Finally, regrading requests must be submitted in writing within one week of the return of the exam or assignment; please note that any such request will subject the work to a complete regrade.
